

# Booster Fund – application guidance

---

Are you an existing community business in England? Looking for help with your community share offer?

The Booster Fund provides support to get your share offer ready. We (Co-operatives UK) can also invest in your share offer by matching investments from your community!

Community shares are a great way for communities to pull together and take ownership of local buildings and land, or to develop new projects or services that benefit people in their community.

This guidance will help you decide whether the Booster Fund is right for your community business and your project.

## Who is behind the Booster Fund?

The Booster Fund is delivered in partnership by Co-operatives UK, Locality, Plunkett Foundation, and Co-operative and Community Finance.

It is funded by Power to Change and the Architectural Heritage Fund. The Architectural Heritage Fund is ring fenced for heritage projects that play an important role in high street revival and the economic resilience of an area.

Funded by:

Delivered in partnership:

---

## Aims of the Community Shares Booster Fund

The Booster Fund supports new and existing community businesses in England that are at all stages of launching a community share issue.

The Booster Fund provides grant and equity funding to support communities in England to take ownership of spaces and services that matter to the community.

Our support includes the very early stages of exploring whether community shares funding is the right choice for your business.

We are especially interested in exploring innovative ways of using community shares, whether that be supporting a wider range of people to invest, enabling younger people to invest and get involved in the governance of these local businesses, or bringing more key services into community ownership.

### **Based in Scotland, Wales or Northern Ireland?**

If you are based in Scotland, Wales or Northern Ireland, find out other routes for [community shares support](#).

---

# What kind of projects are we looking to support?

## Key themes

We are keen to support groups looking to:

- Revive and take ownership of local assets, particularly in areas of high disadvantage
- Protect the services in their local area upon which people rely
- Tackle issues relating to climate and nature crises
- Support digital inclusion
- Swap out expensive debt or re-financing
- Grow and scale the impact of existing community businesses
- Meet the critical needs of their communities
- Create broad and diverse local membership and control

## Booster Fund priorities

We welcome expressions of interest and applications from groups at the early stage of their development, as well those who are ready to launch their share offers. We support both new and existing community businesses.

While we welcome a range of applications, we have the following priorities:

- Promote equal opportunity, diversity and inclusion, including applications from and supporting:
  - Under-represented communities in the use of community shares
  - Disadvantaged communities facing systemic inequality
  - Minoritised ethnicities
  - Less affluent communities (defined as IMD 1-3 areas). Indices of multiple deprivation (IMD) are widely-used datasets within the UK to classify the relative deprivation of small areas
  - Community businesses that embrace diverse leadership
  - Younger people (35 years and under)
- Tackling the climate crisis and improvements to local green environment
- Digital transformation

We expect applicants to be working in at least one of these impact areas:

- Reduce social isolation
- Improve health and wellbeing
- Increase employability
- Create better access to basic services
- Enable greater community cohesion
- Foster greater community pride and empowerment
- Economic regeneration

## An inclusive approach

We believe in being truly inclusive and treating everyone with respect. We seek to be a genuinely inclusive organisation by advancing equality and diversity through our policies and practices. We encourage and welcome applications from people from all backgrounds who are looking to make a real difference to the lives of their local communities.

### Eligibility criteria

To be considered for the Booster Fund, applicants must meet the following eligibility criteria:

- Be based in England. If you're not based in England, [see what support is available](#) if you're based in Scotland, Wales or Northern Ireland
- Have charitable purposes
- Have a trading model
- If not already a Community Benefit Society, a Charitable Community Benefit Society or a Co-operative Society, be willing to convert to one or set one up
- Be exploring or aiming to issue a community share offer, or already launched a community share offer

### Minimum and maximum individual investment limits

It is up to the society at what level to set the minimum and maximum individual investment limits.

To set a lower limit for people living in the local postcodes to the project can be a great way to garner local interest and facilitate a feeling that the society is prioritising and supporting local people. One of the Booster Fund's funders, Power to Change, is especially interested in supporting projects that have high local community engagement.

Societies can also set different limits for investments from businesses and also for institutional investors, such as Co-operatives UK via the Booster Fund.

It is especially good to engage with local co-ops as there is no limit as to how much they could legally invest.

## Investment performance

The Booster Fund has been designed to be an instrument that will be able to recycle its capital. This will be through the cyclical nature of investing into community share offers and gradually withdrawing this capital to use it to re-invest into the subsequent cohorts of share offers. Co-operatives UK has a long-term commitment to the businesses in which we invest, and we act as an active investor, providing guidance and support to our investees. Therefore, applicants to the Booster Fund should be aware that equity investment is fully expected to be repaid by the business, in a patient yet consistent manner. We expect you to fully model the return of our investment over a set timescale, ranging from 5-20 years from the date of investment, subject to location, business sector etc.

As the Booster Fund has been designed to operate as a long-term social investor, we will need to cover its running costs, to be able to continue to make investments into community shares offer for many years. As such, we anticipate most of our investments to be interest bearing. We do not have a fixed % threshold for approving investments, but we are guided by the business sector, location, and economic circumstances of each application. Therefore, applicants to the Booster Fund should consider whether their business model supports the offer of interest, in order to attract capital investment.

#### A note on support for community pubs, cafés and shops/post offices

The Booster Fund receives many, many applications from groups aiming to purchase and run pubs, cafés, shops and post offices. We can only support applications from these sectors that clearly meet some or all of the priorities laid out above. Applicants will need to demonstrate how they will deliver more than a standard level of services. These services should be inclusive and meet the wider needs of the community, particularly the most disadvantaged. Business plans and costings will need to be supplied as supporting evidence – in draft form with grant applications and in final form with equity applications – and must include any activities mentioned in the application.

---

## What support is available?

The Booster Fund offers a variety of support to help you with a share offer:

- [Pre-grant support](#)
- [Development grants](#)
- [Equity – for investment ready businesses and live share offers](#)
- [Subscription underwriting](#)
- [Loan finance](#)

These are detailed below in the following pages.

You can start your application by filling in the [Booster Fund Expression of Interest form](#).

However, we strongly recommend you read this guidance first as it will help you to make a successful application.

---

## Pre-grant support

This support is available to those at a very early stage, to provide a few days support to explore ideas and get you going with using community shares in your business.

Groups can use this support to access professional skills, particularly at the early stages of developing a community business proposal.

The Booster Fund is committed to diversity and recognise that different communities have different needs and do not all have the same access to expertise to realise their ambitions.

As such, if you are at an earlier stage in your plans of exploring community ownership through a community share offer, we may be able to provide you with a few days support from an advisor. You may find this an easier starting point than making a full grant application.

---

**Find out about or apply for pre-grant support**

**Find out more**

# Development grants

This grant is to help you to get investment ready and prepare your community share offer for launch.

We expect to award development grants of between £2,000 and £10,000, averaging around £5,000.

Your grant request can include costs connected to your community share offer, including:

## **Part one grant – preparing your share offer:**

- Governance support, such as making changes to your Rules, converting your organisation to a Community Benefit Society, attaining charitable status etc. This could be via Co-operatives UK's Advice Team as a paid for service
- Legal registration of your society
- Financial planning
- Community engagement work
- Development of a strong business plan
- Development of high-quality share offer documents
- Property valuations

## **Part two grant – launching your share offer:**

- Undertaking a Standard Mark assessment, the quality assurance mark for community share offers
- Marketing costs, to reach potential community shares investors
- Hosting the share offer online, using a web platform or your own website

We expect your share offer documents to be assessed for the Community Shares Standard Mark before launching your offer as we will ordinarily expect to only invest in Standard Mark compliant offers.

Development grants are paid in two instalments. The second instalment is dependent upon the satisfactory completion of the development activities paid for by the first instalment. You will need to complete a grant report after each stage.

Once you have completed the post-grant reports, you can then complete and submit an equity application.

---

## **Equity – for investment ready businesses and live share**

## offers

If you are investment ready, with your share offer documents ready or nearly ready to launch your offer, you can apply for equity funding. You should have already been awarded the Community Shares Standard Mark for your share offer.

You can also apply for equity if your community share offer has already launched but we expect your share offer to have already been awarded the Standard Mark.

The Booster Fund Panel will look at your investment needs, business case and how well you fit the investment priorities to determine how much we could invest.

Investments could range from £10,000 to £100,000, although the typical investment is expected to be £20,000-50,000. Neither Co-operatives UK nor Community Shares ICOF will invest over 50% of the total share capital held by a society in order to avoid becoming a majority shareholder.

For example, if you were awarded Booster Fund equity match of £20,000, we would match every £1 invested by your community in your community share offer up to £20,000, provided you have reached your minimum target once our investment was included, and your maximum target was at least £40,000 (so that we don't become the majority shareholder).

Through this equity investment, Co-operatives UK and/or Community Shares ICOF (CSI) becomes an institutional investor in your community share offer. We both invest on the same terms as all your other community investors, with the same voting rights and terms as laid out in your share offer document.

Investment may be made by Co-operatives UK or Community Shares ICOF (CSI), or in some cases by both investors. Please be aware that although you only need to complete one Booster Fund application, Co-operatives UK and Community Shares ICOF have separate investment panels, so it is possible you may not be awarded the total investment for which you applied.

## Examples of funding mixes

### Example 1: Society ABC

Society ABC launched a share offer with a:

- Minimum target of £20,000
- Optimum target of £30,000
- Maximum target of £50,000

The Booster Fund awarded it with an offer of investment of £25,000 from Co-operative UK.

The community invested £36,000 so in the end the Booster Fund invested £14,000 from Co-operative UK to take investments up to the share offer's maximum target of £50,000. We are happy to have been 'crowded out' of the remaining £11k of our offer, as the society was only seeking to raise a maximum of £50k.

### Example 2: Society MNO

## Example 2: Society MNO

Society MNO launched a share offer with a:

- Minimum target of £100,000
- Optimum target of £130,000
- Maximum target of £150,000

The Booster Fund awarded it with an offer of investment of £15,000 from Co-operative UK.

The community invested £124,000 so in the end the Booster Fund invested £15,000 from Co-operative UK, meaning that the share offer raised £139,000 in total.

## Example 3: Society XYZ

Society XYZ launched a share offer with a:

- Minimum target of £250,000
- Optimum target of £300,000
- Maximum target of £350,000

The Booster Fund awarded it with an offer of investment of £50,000 from Co-operative UK. The Booster Fund partner Community Shares ICOF also made an offer of investment of £50,000.

The community invested £275,000 so in the end the Booster Fund invested £37,500 from Co-operative UK. Community Shares ICOF also made an investment of £37,500. The combination of community, Co-operatives UK and Community Shares ICOF investments took investments up to the share offer's maximum target of £350,000. Again the reason our investments were lower than the original offers of investment is we would have exceeded the share offer's maximum target.

## Ongoing support

Community businesses that receive Booster Fund equity investment from Co-operatives UK can also receive ongoing support and advice from Co-operatives UK, the voice for the UK's thousands of independent co-operatives and an active investor in community businesses.

---

## Subscription underwriting

This service is offered by our partner Co-operative and Community Finance (CCF) and is fee-free.

If you think affordability is an issue for your community investors, CCF can offer you an interest-free repayable loan to enable people to buy shares through instalments over a maximum of 12 months, with the society receiving the full investment upfront.

Typically, between £10,000 and £25,000 can be underwritten by this service. You might use this to help less affluent members of your community buy the minimum shareholding amount that you set in your offer documents.

For example, if you set your minimum shareholding at £100, then individuals could pay for this via instalments throughout the year, paying in £10 per month over 10 months. Without subscription underwriting, you would have to wait until the end of the year to collect all the equity invested, which could be problematic if you need the money upfront to complete the purchase of a building, for instance.

Funds would be advanced to you on completion of the share offer raise to match any money committed as community shares bought through subscription. This money is then paid back by you to CCF as the monthly instalments from individual investors are paid to you.

Please note this is a short-term loan, provided as debt to be repaid under a standard loan agreement, we will recover the loan through fixed instalments (the same amount each month) by Direct Debit over an agreed term, modelled over 12 months but may be shorter and flexible as required. It is assumed repayments to CCF will track at least a month behind allowing the society to collect funds from individuals. The repayment schedule would be agreed at the loan agreement stage.

Please also note that the society is responsible for recovering the payments by instalment from individuals and responsible for all associated administration and membership. CCF do not have any contact with investors, only with the Society as the borrower.

Kindling Farm used this text in their Share Offer Document:

*Purchasing by Instalment - We hope to be able to offer the chance to purchase your shares in X equal monthly instalments and are currently applying for support from Co-operative and Community Finance (CCF) to enable us to do this. This facility is not currently available via the Ethex platform so please contact xxxxxxxx directly by emailing xxxxxxxx. We will email an application form to you to complete and return to us, which will include a question asking if you would like to pay by instalment. We will then email you to approve your application and you will be asked to set up a standing order with your bank to make your payment over 8 monthly instalments. Should you fail to pay your instalments and fail to reach the minimum shareholding of £200 within the X month period, all monies received in this period shall be refunded and you shall cease to be a member of the society. Ethex will be responsible for managing the shareholder registry once the offer has completed.*

Stretford Public Hall used a more sophisticated online application tool and payment process for their subscription share investors using the Stripe payment processing platform.

In the two examples above the societies decided to only honour shareholding once the minimum had been met through the instalments. You may however wish to treat instalments 'to date' as share capital investment, as long as the rules allow.

If the society doesn't raise all the monies in instalments as planned, to match the funds received as a loan, CCF would work with the borrower to help them bridge the finance gap.

If this service is of interest, please select this option on the application form.

---

## Loan finance

If you apply for Booster Fund equity, we may also be able to provide access to a loan through our partner Co-operative and Community Finance (CCF).

This would be debt finance to sit alongside a share offer and could be used to make up any shortfall in funds raised through a share offer were you to only reach your minimum share offer target amount.

This loan finance can be up to £75,000, in most cases as unsecured lending, but could rise to £150,000, especially where there is an option to secure against land or property. CCF can also help broker larger finance deals, as appropriate.

If you are interested in this, just let us know on the application form.

---

## What is a community business?

The Booster Fund supports community businesses. Community businesses can be any type of business that trades products and services. This can include shops, energy schemes, transport, farms, community hubs, housing, health care, pubs, sports clubs, gardens or leisure centres, run by local people for the benefit of the local community.

What they all have in common is that they are inclusive and give decision making power to local people and that the profits they generate flow back into the community to deliver positive impact and improve the place.

We only fund community businesses that have charitable purpose and reinvest their profits for the benefit of the community they serve.

Community businesses are characterised by these four values:

### **Local roots**

By local roots we mean a business started and run by local people, that will benefit the community around it. Community businesses are usually built around the strengths and assets of a place and address the needs of the community of that place.

### **Accountable to the local community**

A community business gives local people real, ongoing decision making power to shape how the business is run and what it does. This can happen in many ways (for example, membership structure, ownership, broad range of local trustees), but you must be able to show evidence of regular community influence in decision making.

### **Trade for the benefit of the local community**

Community businesses have a clear trading model and sell services and products in and around their local area. Community businesses create benefits for the local community with their profits and through the way the business is run.

### **Broad community impact**

Community businesses support the needs of a variety of different groups in their community. They may have a specific focus on a disadvantaged group or support the local community more widely.

---

# Community shares

## What are community shares?

Community shares are a type of share capital that can only be issued by co-operative societies, community benefit societies and charitable community benefit societies.

Community shares confer membership and all members have only one vote, regardless of the size of their shareholding, so the society is democratic.

Community shares are not like ordinary shares. They cannot be sold or transferred to someone else. Instead, the society allows shareholders to withdraw their money (share capital), subject to terms and conditions that protect the society's financial security.

Community shares give local people a real stake in ownership of the local community business, as well as providing the community business with critical patient, flexible, mission-aligned funding

Community shares are non-transferable, withdrawable share capital that provide community businesses much needed money to start, grow, and be sustainable.

## Running a Community Share Offer

Check out the helpful guides produced by the Community Shares Unit when preparing to launch your community share offer – [A guide to investing in community shares](#).

---

# Community Shares Standard Mark

## What is the Community Shares Standard Mark?

The Community Shares Standard Mark is awarded to offers that meet national standards of good practice. It is overseen by the Community Shares Unit. These standards ensure that:

- The offer document and application form are easy to understand
- Potential investors are provided with all the facts they need to make an informed decision
- The facts are supported by the annual accounts and/or business plan for the society
- Nothing in the documents is purposefully incorrect, confusing or misleading

Societies promoting the public sale of community shares (withdrawable, non-transferable share capital) are exempt from financial promotions regulations but are still subject to general law. In the absence of statutory regulation it is difficult for societies to know precisely what is expected of them, or to demonstrate that they are engaged in good practice.

The Standard Mark fills this gap by setting standards of good practice. It is a voluntary form of self-regulation, based on an independent assessment by a licensed practitioner. This assessment acts as a final check on the quality of a community share offer before its public launch.

### Why is the Standard Mark important?

The Standard Mark is designed to promote public confidence in community shares. It also provides confidence to societies and their management committees, to commercial lenders, social investment financial intermediaries and public funding agencies. Since it launched in 2015, more than 242 Standard Marks have been awarded to community share offers.

All groups receiving support from the Booster Fund are expected to engage with the Standard Mark assessment process and to be awarded the Community Shares Standard Mark for their community share offer.

Applicants are expected to engage with community shares licensed practitioners to undertake the Standard Mark assessment.

The Community Shares Unit maintains a Practitioner Directory of Licensed and Registered practitioners capable of awarding the Standard Mark and providing business support to community groups and societies planning to run a community share offer. Read more about the Community Shares Standard Mark.

---

## Terms and conditions of equity investment

- Booster Fund equity is made as investment in withdrawable, non-transferable share capital into the community business
- The equity will be held either by Co-operatives UK and/or our partner Community Shares ICOF (CSI). The society will be sent an offer letter from the relevant investor(s); Co-operatives UK and/or Community Shares ICOF
- Booster Fund investment is on the same terms and conditions as outlined in the society's share offer document, and on equal terms with other community investors
- Individual investment by either Co-operatives UK or Community Shares ICOF will not exceed 50% of the society's overall withdrawable share capital, so that neither becomes a majority shareholder in the society
- The share offer must meet its minimum investment target (which can include the agreed Booster Fund equity match from Co-operatives UK and Community Shares ICOF)
- If your share offer is successful in meeting its targets from community investors, the Booster Fund investment can be 'crowded out', with priority given to applications from community members
- Booster Fund equity can only match community investment from individuals and local organisations – it cannot be used to match other institutional investment (i.e. where an investment is above the maximum individual shareholding limit stated in the offer document and/or is subject to its own terms and conditions)
- Any requests by Co-operatives UK and/or Community Shares ICOF for share withdrawals will be limited to the same maximum amount that any other member may request

---

## Diversity and inclusion

Co-operatives UK and our funders and partners are committed to the advancement of equality, diversity and inclusion.

We seek to be genuinely inclusive organisations by advancing equality and diversity through our policies and practices.

We encourage and welcome applications from community businesses from all backgrounds, who meet our grant requirements, and who are looking to make a real difference to the lives of their local communities.

We expect applicants to the Booster Fund to have an equality and diversity policy in place and to have considered disability inclusion. You can read our partner Power to Change's [disability inclusion guide](#) for guidance.

Please let us know by email [communityshares@uk.coop](mailto:communityshares@uk.coop) if you need this guidance in large print, braille or audio recording.

---

## How to apply

The Booster Fund opened to applications in 2022 and is anticipated will be open for applications until 2025, with monthly assessment panel meetings. There are two stages to the application process.

### Stage 1: Expression of Interest

You must complete the [Expression of Interest Form \(EOI\) form](#). You can see a [preview of the form questions and guidance](#). The EOI helps us to assess if your application is eligible and well it fits in with the aims and priorities of the Booster Fund.

You will be expected to provide evidence to verify the statements you make in the EOI if you are invited to make a full application.

We will assess the EOI form and then we will notify you by email, within 2 weeks, if you are eligible to apply or not and your if application meets our criteria well enough to proceed.

If you have any tight deadlines to meet that need a quick response, please let us know by contacting us at [communityshares@uk.coop](mailto:communityshares@uk.coop)

**Fill in the expression of interest form**

**Next step**

### Stage 2: Full application

If you are successful at EOI stage, you will be sent an invitation to apply with a link to your unique application form to complete online for the appropriate support – grant and/or equity (including loan finance and subscription underwriting if this is of interest to your group).

You can view [preview the questions for the Grant and Equity application forms](#).

#### Grant application

Applicants will need to show that they are planning to undertake a community share offer within a year.

The applicant is sent the link to their unique form, so that all the application information is stored on their applicant record on our CRM system. Applicants are asked to provide an itemised breakdown of their grant request and have the option to attach supporting documents, such as background information, community engagement plans and governing documents.

## Equity application

Equity applicants are expected to have already engaged with community shares licenced practitionersto undertake the Standard Mark assessment.

Applicants are asked to provide full details of the community share offer and demonstrate whether you have been awarded the Standard Mark. You will also have to attach a range of supporting documents, such a business plan, financial accounts and share offer documents.

---

## Timeframes

Once you have submitted your application form, you may receive an email or call from Co-operatives UK and or Co-operative & Community Finance to ask for any further information we may need to assess the application. In some circumstances, typically if a loan is required, we may also request a site visit.

Applications are reviewed at the next available Booster Fund Investment Panel meeting. The panel meets every 4 to 6 weeks. We aim to get back to you within a decision within 6 to 8 weeks of submitting your application.

If your application is successful, you will receive an offer letter detailing the terms and conditions of our offer, as well as information about the next steps.

If you are unsuccessful, you will receive an email with a small amount of feedback on your application. We may signpost you to other relevant support and funding opportunities. There is no right of appeal against our decisions. However, unsuccessful applicants are invited to submit new applications.

Please note:

- You must complete the Expression of Interest form first to apply for grant or equity
- If you apply for both grant and equity, you will first have to apply for grant, and if successful, then apply for equity to secure the offer of equity investment

---

## How we make decisions

### Expression of Interest applications

EOI applications are scored against our eligibility and priority criteria – those that clearly meet our criteria will be invited to complete a full application form. Those that fail our eligibility checks and/or clearly fall short of our criteria will be informed that they cannot continue. If an application is marginal, we will call the applicant to seek further information before making a decision.

All final decisions relating to applications to the Booster Fund grants and equity are made by our Booster Investment Panel.

### Pre-grant support

Pre-grant support applications are assessed by our programme management team with our funding partners and may be referred to the Booster Fund Investment Panel.

### Grant applications

Each Grant application is given a score from 1-5 according to 'Impact'; 'Innovation'; 'Viability'; 'Grant request (analysis of costings)'.

### Equity applications

Each Equity application is intensively assessed by an independent assessor, who makes a recommendation to the Booster Fund Investment Panel.

All equity applications are also considered against:

- Eligibility in meeting our definition of a community business
- Fit with the aims of the Booster Fund
- Community benefit
- Relative deprivation of target community
- Applicant willingness to engage with the Booster Fund and comply with community shares best practice standards
- Geographical spread of our investments
- Business sector / model innovative features of business model, offer structure, offer promotion etc
- Availability of alternative sources of development finance, equity or loan

All final decisions relating to applications to the Booster Fund grants and equity are made by our Booster Fund Investment Panel.

Some of our funding allows us to work with Community Shares ICOF (CSI) who can be sole or joint investors through the Booster Fund application process. Our partner Co-operative and Community Finance (CCF) can also provide any subscription underwriting or loan finance. Co-operatives UK and the Booster Fund Panel will work closely with CSI and yourself to determine the best investment options for you. Final decisions on financial support by CSI and CCF will ultimately be made by their own panel.

---

## Support and resources

Co-operatives UK is the voice for the UK's thousands of independent co-ops. We support co-operatives to start up and thrive – join us to access expert advice, events and training.

We want to make it easier for community businesses not only to survive, but to thrive.

### What is a co-operative business?

Learn more about [what is a co-op](#).

### Start a new co-operative or community benefit society

For groups just starting out, there is a step by step guide to starting a co-op, links to Co-operatives UK support programmes for starting a co-op or converting an existing business to a co-op. Find further information here: [start a new co-op](#).

### Support for your co-operative or community benefit society

As the network for the UK's thousands of co-operative businesses, Co-operatives UK provides support in HR, culture, governance, finance, marketing, membership strategy and co-operative development. Browse our extensive library of online resources, blogs and information and get in touch for bespoke consultancy support and training. Find further information here: [support for your co-op](#).

### Community Shares Handbook

This Handbook sets out guidance for societies and practitioners who provide advice on community shares, a term used to describe the withdrawable share capital of co-operative and community benefit societies. Read more here: [Community Shares Handbook](#).

### Guide to Investing in Community Shares

We have a simple guide to community shares that includes a glossary to explain some of the words used in this guidance. Read more here: [Guide to Investing in Community Shares](#).

## Monitoring and closure

Co-operatives UK, its funders, delivery partners and grant administrators will maintain the following records as an audit trail of grant administration:

- Claim requests and supporting evidence of grant conditions being met and of past grant expenditure
- Grant monitoring reports in line with grantee agreements (for example, brief project updates, impact monitoring forms)
- Reports will be produced for the funders as they require, providing a summary of the activities undertaken by the beneficiaries
